

NHS datasets used for research and service planning – what do you think?

You are invited to take part in a research project about how health and social care data should be used to inform public health policy and plan health care services.

- We want to understand a range of views on how data from health and social care organisations should be used to improve health services across Kent, Surrey and Sussex.
- Participants will attend a presentation and discussion group to share views with us (3 hours total, split over 2 sessions, online).
- The study is funded by the National Institute of Health Research and to say thank you for taking part you will receive a voucher worth £50.

Have your say

Sign up to the study if you are over 18, a citizen of Kent, Sussex or Surrey and have used health or care services. We will get in touch if you have a place in a group, and find a group time that is convenient to you.

Make a difference

To tell us you're interested in taking part, register here: tinyurl.com/unlockingdata or call 01273 641974 and leave a message, or email Kathryn at k.stanley@bsms.ac.uk.
